

## Product Design Assignment

### Design Task

Subhash is a service engineer at WaterPure, which has the most advanced range of water purifiers for homes. Subhash is responsible for all water purifier repairs in and around HITECH city area, Hyderabad. He manages service requests raised by customers and posts the status of the ongoing/completed services to both the customer and his company. He also raises requests for spare parts if needed.

**Design a Web (Desktop) software application which helps WaterPure service engineers to manage their day-to-day tasks considering the above scenario.**

### Expectations and guidelines

1. Be creative in terms of innovative problem-solving ideas, multiple solutions, and rich visualisations. We would love to see your brainstorming sketches and notes in your submission.
2. Feel free to make assumptions where there is no data on the activities and nature of users.
3. Make a mockup which displays your design sensibilities such as problem-solving, interaction, visual design, UI guidelines etc. Mockups which show proficiency in prototyping tools is a bonus.
4. Your Designs doesn't need to be 'interactive' but should have enough details which capture at least one complete flow- end to end scenario.

### Submission Procedure

Send a mail to [hr@convin.ai](mailto:hr@convin.ai) along with following details:
